RE: PGE Substation E (ESCI No. 3976)
Source Control Decision

Dear Jim:

Thank you for submitting the Oregon Department of Environmental Quality's (DEQ) PGE Substation E Source Control Decision to EPA for review and subsequent responses to our comments. We appreciate DEQ's ongoing efforts to keep EPA informed about upland contaminant sources to the Portland Harbor Superfund Site. Based on the summary information provided by DEQ, EPA agrees at this time that this site does not appear to be a current source of contamination to the Willamette River. EPA may revisit this matter at any time should EPA become aware of any data or information warranting further analysis.

If you have any questions regarding this letter, please feel free to contact me at (206) 553-6705 or koch.kristine@epa.gov.

Sincerely,

Kristine Koch
Remedial Project Manager
